(SPECIFT AIR OR SEA POUCH	CLASSIFICATION	etic type
TO : Chief, KURTOT	DATE: MAR 1 7 1954	•
ATTN:	INFO: Chief, EE	
	Chief, SR	
SUBJECT: GENERAL— AQUATTO	C/Operational	
specific— Leafle	t Balloon Release Mechanism and Leaflet Rockets	
1. distribution of le	has several projects which involve the by means of balloons and	
rockets.		
3. A number	of different release mechanisms are currently being used	
in antual amonation	ns It is felt that KURTOT could study existing models	
and possibly devel	ns. It is felt that KURIOT could study existing models op one or more types of mechanisms which could be	
and possibly devel	ns. It is felt that KURIOT could study existing models op one or more types of mechanisms which could be dopted as standard release mechanisms.	
and possibly devel manufactured and a	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present	
and possibly devel manufactured and a	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e.	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models ted by dispatch to KUBARK Headquarters as follows:	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models ted by dispatch to KUBARK Headquarters as follows: DOC // REV DATE 28 MAY BY 0/9373 GRIG COMP 56 021 56 TYPE 10	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models sted by dispatch to KUBARK Headquarters as follows: DOC // REV DATE 28 MAY BY 0/8323 GRIG COMP 5 0PH 5 17PE 10 GRIG COMP 5 0PH 5 17PE 10	
and possibly devel manufactured and a 4. Likewise models could be im the ones now in us	op one or more types of mechanisms which could be dopted as standard release mechanisms. with the leaflet rocket, it is felt that the present proved upon to get more distance than is possible with e. information and samples or drawings of existing models ted by dispatch to KUBARK Headquarters as follows: DOC // REV DATE 28 MAY BY 0/9373 GRIG COMP 56 021 56 TYPE 10
